

Sprint 1 delivery

Academic staff assessment, B18-02

Reflection on the process. What was well?

- Discussions about ambiguities didn't take more than 15 minutes
- All of 5 team members were present on every meeting
- Tasks distribution done without any problems
- A lot of information for framework studying
- Everyone knew what others are doing
- Atmosphere within the team
- No meeting postponement
- Planning Poker
- We had breaks

Reflection on the process. What need to improve?

- Wanted to finish more tasks related to the system itself
- Overall gatherings took ~2-3 hours. We can be faster
- Not all gaps in expertise are sealed yet
- Task distribution itself is unbalanced

Actual result

For now, we have simple prototype. It's functional is very basic: create question, vote in this question, see results. However, this is perfectly working, containerized web application, so it will be easy to extend functional in future.
